Mahmudova Sarvinozning
«Antropologiya inson
haqidagi ta'limot»
mavzusida mustaqil ishi**

Yunoncha sophia – donishmandlik, anthropos – inson va logos – ta'limot so'zlaridan kelib chiqqan «falsafiy antropologiya» atamasi etimologik jihatdan inson haqidagi falsafiy ta'limotni anglatadi.

Falsafiy antropologiya insonning alohida borliq manbai sifatida kelib chiqishi, tadrijiy rivojlanishi va mavjudligining o'ziga xos xususiyatlariga doir falsafiy qarashlarni aks ettiradi.

Falsafiy antropologiya XX asrning 20-yillarida asosan M.Sheler, A.Gelen, X.Plesner asarlari ta'sirida uzil-kesil vujudga keldi. Xususan, M.Shelerning «Insonning kosmosdagi o'rni» asarida inson haqida fundamental fan yaratish lozimligi qayd etiladi va uni falsafiy bilish dasturi taklif qilinadi.

Inson har safar mutafakkirlar diqqat markazidan o‘rin olar ekan, uning mohiyatini yangi tarixiy sharoitda va yangicha nuqtai nazardan anglab yetishga harakat qilib, uni qayta va qayta yangidan kashf etganlar. Pirovardida, falsafa fanida insondan murakkabroq va ziddiyatliroq predmet yo‘q, desak, hech mubolag‘a bo‘lmaydi.

Inson falsafiy muammo sifatida.

Falsafa tarixida insonga murojaat etmagan, inson moddiy va ma'naviy borlig'ining turli tomonlarini bevosita yoki bilvosita tahlil qilmagan faylasuf yoki falsafiy yo'nalishni topish deyarli mumkin emas.

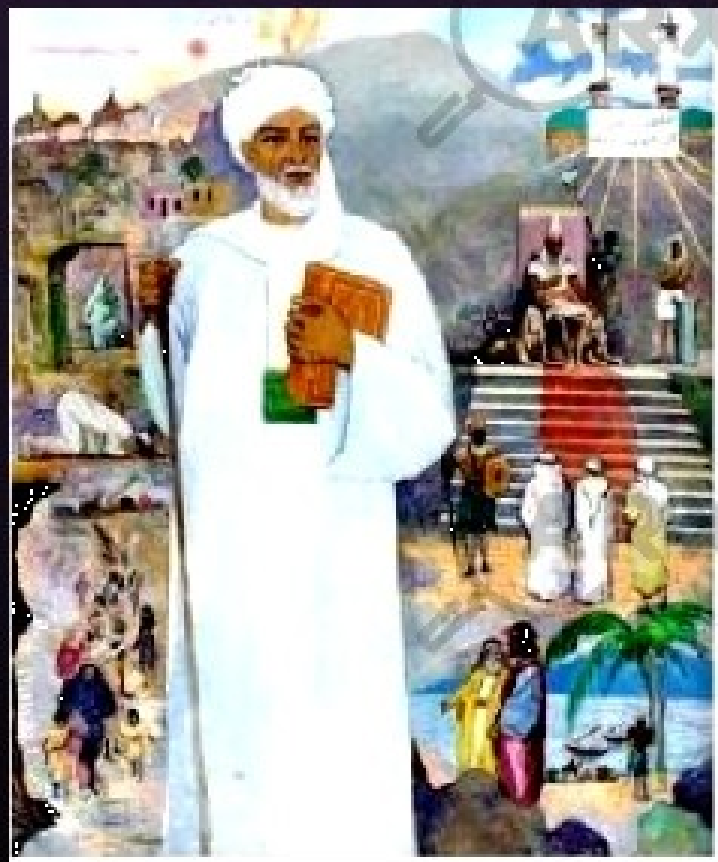

Aksariyat falsafiy va diniy tizimlar katta olam yoki makrokosmga zid o'laroq, insonga mikrokosm yoki kichik Koinot sifatida qarab, uni butun olamni tushunish kaliti deb hisoblaganlar. Faylasuflar inson sirining tagiga yetish borliq jumbog'ining tagiga yetish bilan barobar ekanligini qayta-qayta anglab yetganlar.

Umuman olganda, barcha zamonlarda insonda umumiy asosni izlash bilan band bo'lgan Sharq tafakkuriga hozir ham insonni va uning tashqi dunyo bilan aloqasini tushunishga nisbatan G'arb falsafasidagidan o'zgacha yondashuv xosdir.

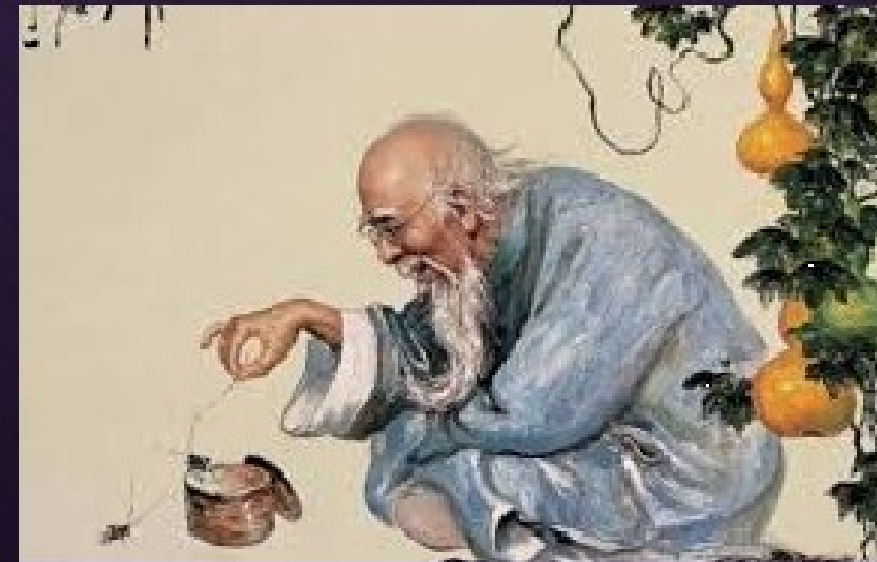

XX asr boshida hind mutafakkiri S.Vivekananda shunday deb yozgan edi: «Inson tabiatni o'ziga bo'ysundirish uchun tug'iladi va bu o'rinlidir, ammo G'arb «tabiat» deganda faqat moddiy, tashqi dunyoni tushunadi

Zero Forobiy aytganidek - "Odamlar o'zlarining xususiyatlariga va tabiiy ehtiyojlariga ko'ra jamiyat tuzadilar. Ularning harakat va fe'llarini dastavval bora-bora odatlarga aylanadigan tabiiy qobiliyatlar belgilaydi".

O'z-o'zingni angla va shu orqali dunyoni anglaysan. Dunyoni insonning teran qatlamlariga kirmasdan sirtdan bilishga bo'lgan barcha urinishlar narsalar haqida faqat yuzaki tasavvur hosil qilish imkonini beradi. Insondan sirtga qarab harakat qiladigan bo'lsak, narsalar mohiyatini hech anglay olmaymiz, zero bu mohiyat insonning o'zida mujassamlashgan.

Teotsentrizm falsafasini boshqa falsafiy nuqtai nazarlar – antropotsentrizm va kosmotsentrizm siqib chiqara boshlagan Uygʻonish davrida insonga doir qarashlarda jiddiy oʻzgarishlar yuz berdi.

Oʻrta asrlarda inson u yoki bu korporatsiya vakili sifatida amal qilgan boʻlsa, Uygʻonish davrida u oʻzlikni anglash tuygʻusi va ijtimoiy nuqtai nazari oʻsishi natijasida oʻz manfaatlarini ifoda eta boshladi. Inson shaxs sifatida kamol topdi.

Demak, inson o'zini dunyodan oldinroq va ko'proq biladi, ayni shu sababli u dunyoni o'zidan keyin va o'zi orqali anglab yetadi.

Falsafa dunyoni inson orqali ichdan bilishdir, fan esa insondan tashqaridagi dunyoni yuzaki bilish demakdir. Insonda mutlaq borliq, insondan tashqarida esa – nisbiy borliq namoyon bo'ladi.

Darhaqiqat, antik davrdan boshlab insonga bo'lgan qiziqish dam kuchayib, dam ma'lum vaqt pasayib turgan, lekin hiech qachon yo'qolmagan. «Inson nima?», degan savol bugungi kunda ham avvalgidek jahon falsafasidagi o'ta muhim masalalardan biri bo'lib qolmoqda, insoniyatning eng o'tkir aql-zakovat sohiblari e'tiboridan tushmay va ayni vaqtda o'zining uzil-kesil, umumiy e'tirof etilgan yechimini topmay kelmoqda.
